Our nursery

Our Projects

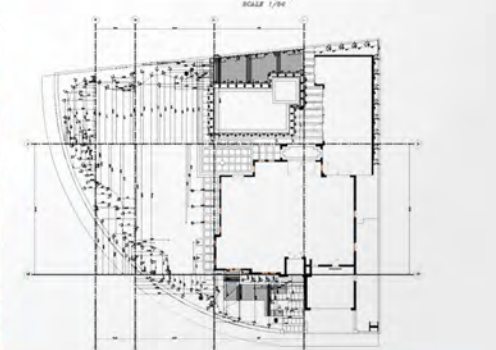

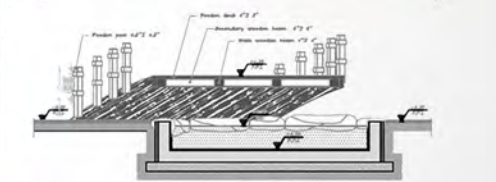

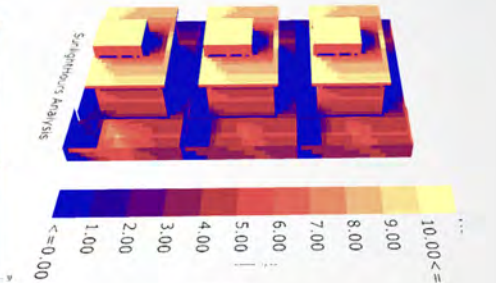

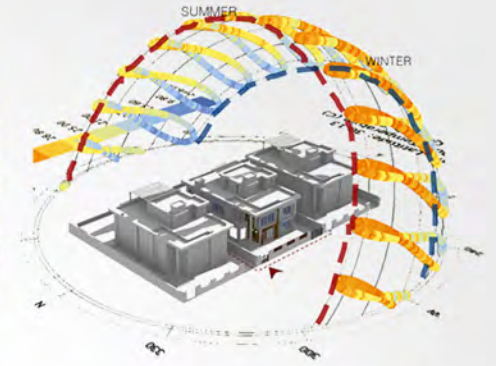

OUR SERVICES

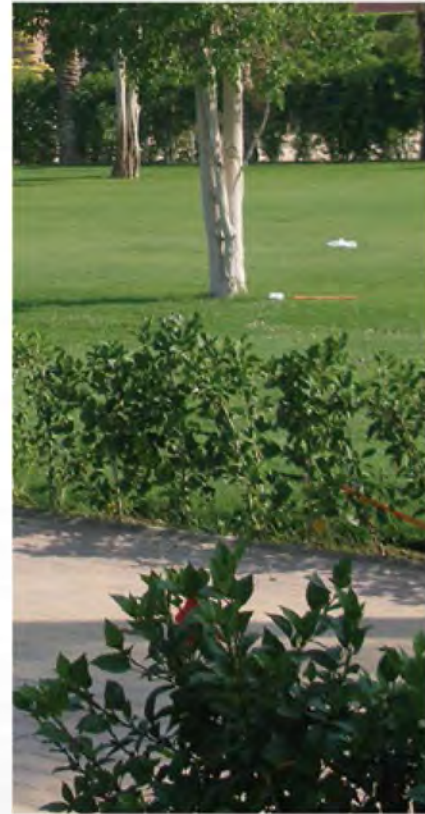

Designing

We may see different gardens are using the same materials and the same planting details. However, one of them is more attractive than others. That is the mean of the design. And the real challenge comes in the ability to form these details aesthetically according to the climatic data of our client site specifically. In order to reach to the best adaptive design which is very helpful for selecting the most durable material and native plant species at a minimal cost.

Softscape

Regardless of garden style, let yourself be guided by the principles that underlie all garden designs. It is easy to overlook one or more of these principles, then look at other people's garden designs and wonder, "Why do some garden styles look so much better others, even though similar plants have been used?" Very likely, the answer to this question lies in adherence to the principles of design. For a full treatment of landscape or garden design principles

Waterscape

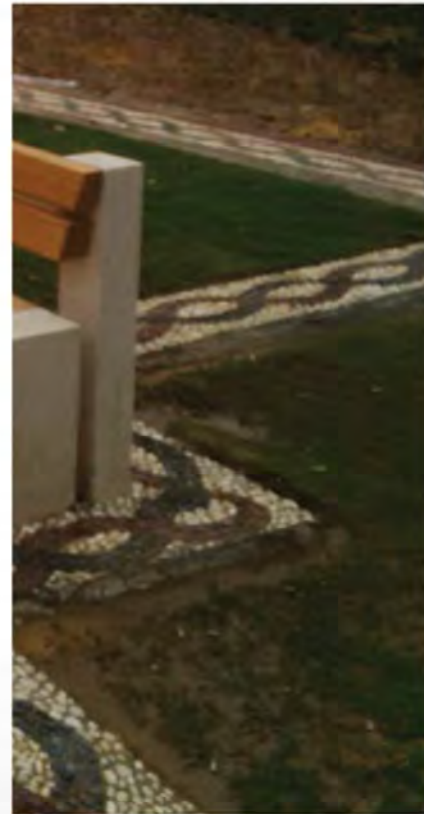

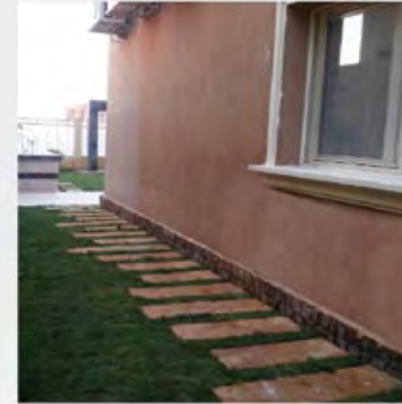

Lake & fountains : Waterscape combine the element of relaxation into your landscape ,We help you create the water features of your choice in a style that is suitable with your garden design.

Swimming pools : we make sure that your swimming pool design reflects your taste, fits your landscape's unique characteristics and is built with attention to detail.

Hardscape

Flooring : Flooring occupies a significant position within the Landscape for that we offer in many of the raw materials (marble - stone - teak - gravel)

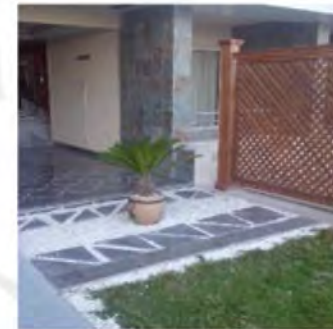

We also have many uses for the flooring to cover all spaces within the garden

(pool deck –Seating areas–stepping stone)

Walls : Different textures and shapes for walls and partitions inside the Garden makes harmony with plants and landscapes

Outdoor kitchens & furniture

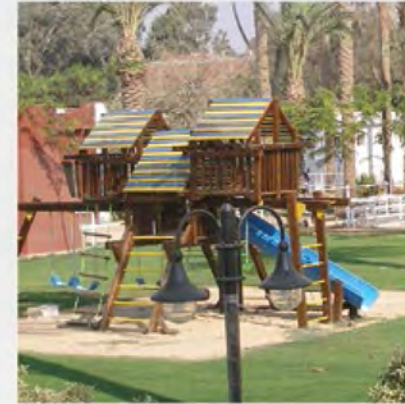

The beauty of the garden is complete completion of the functional elements of beautiful furniture

Wooden works

give & natural beauty of the garden as well as the ability of wood to withstand weather conditions do not compare any other severe and so we offer many works wood inside the garden (pergolas - bridges - fences - separators)
But we did not forget to provide many of the pergolas and metal Tents, which cover the needs of some gardens.

OUR NURSERY

Owning and Managing Nursery in Monufia Governorate The Ornamental Plants Production Center in Egypt has made our team an opportunity to select the best quality for our projects
